using a discount rate applicable to uncreditworthy firms.

(7) Based on our uncreditworthy determination for certain RZBC companies, we are applying an uncreditworthy benchmark rate to certain long-term loans received by RZBC companies in relevant years in our recalculation of the aggregate subsidy benefits for the Shandong Policy Loan and Export Seller’s Credit for High- and New-Technology Products programs.

(8) We are not calculating a subsidy rate for the GOC’s provision of steam coal for LTAR for these final results because we have determined that we require more information on the de facto specificity of this program and, thus, will have to defer a decision on the program’s countervailability to a future administrative review. See Issues and Decision Memorandum at Comment 6.
