

# OPUS Projects Training Dataset - NEWULM

The data, and all metadata (including photos, and mark descriptions) in this training data set are for **TRAINING PURPOSES ONLY** and are the property of the National Geodetic Survey.

This training data was collected for Aeronautical Survey Program (ASP) purposes at the New Ulm Airport in Minnesota. The start and end times, data intervals, antenna types and heights are valid for these data. All other information appears meaningful but *should be considered fabricated*.

## Contents:

- 14 files – GPS Data as RINEX (organized in 4 folders by Session)
- 21 files – Photos of Marks Occupied as JPG (in one folder)
- 1 file – Scans of GPS Observation Logs as PDF
- 1 file – Datasheets of marks in NGS Integrated DataBase (IDB) as TXT
- 1 file – this README document as PDF

Name	Date modified	Type	Size
Photos	01/28/22 09:39	File folder	
Session121A	01/28/22 10:23	File folder	
Session122A	01/28/22 09:22	File folder
