

Digital Level

DL-103 Digital Levels

- The DL-103 is simple operation
- The DL-103 uses the same bar code measuring technology as the DL-101/102 digital levels
- An RS-232 port is incorporated into the DL-103 so a data collector can be used to store the measured data
- The DL-103 is "waterproof" and based on IPX6
- Provides low power consumption and allows for 20 hours of continuous operation.

DL-100 Series Digital Levels

- Topcon's DL-101 and DL-102 Digital Levels increases speed, accuracy and productivity in the field
- Both levels store data internally and the data can be transferred directly to the PC from the RS232 port
- The internal memory is 128K and up to 2,400 points can be stored in memory
- A data collector can also be connected to the DL Series RS232 port for differential leveling
- Enhanced features of the DL series software include Inverted Rod Readings, Compatible to STAR * LEVEL Software and User Defined Point Numbers.
