

NGS Expands Email Subscription Options

NOAA's National Ocean Service sent this bulletin at 10/06/2021 03:00 PM EDT

NGS News

Read News Bulletins in Additional Format

NGS uses its “News” emails to inform subscribers about updates to existing products, upcoming NGS-sponsored events, open job opportunities and more.

Previously, these “News” bulletins were only accessible to email subscribers. [Now, previously sent “News” bulletins are available on the NGS website](#) as both HTML links to share with others and accessible PDFs to review at a later time.

These formatting options are consistent with the [GPS on Bench Marks Updates, which are all available online](#) as HTML links or accessible PDFs.

Send Us Your Feedback

NGS website visitors include surveyors, engineers, GIS professionals, mapping users, as well as educators and students. Typically, “News” bulletins have focused on product updates, beta testing opportunities, event registration, and job opportunities.

Looking ahead, NGS wants to keep improving its communications offerings. What **subject areas** or **type of content** would you most like to read about in the future?

Send your suggestions to NGS.Feedback@noaa.gov.

Add Subscriptions to Learn More

In case you missed it, there are three subscription services in addition to “News.” Read the descriptions below, and consider subscribing to more than one.

NGS Webinar Series – Each month, a speaker will give a presentation on various topics related to NGS programs, projects, products and services to educate constituents about NGS activities.

NGS Training – Receive emails about online and classroom-based training opportunities when new classes are available.

NGS GPS on Bench Marks – By participating in the GPS on Bench Marks (GPS on BM) campaign, your efforts could improve the 2022 Transformation Tool and help the local surveying community.
